Cop. 2

OFFICE OF THE CITY ENGINEER

APRIL 1956

The attached booklet was made for the use of those public and private agencies requiring a complete list of changes made in April 1956 to the street numbers and street names in the City of Peoria.

The form of the change sheets making up the booklets is similar to the form used in 1955, showing name of occupant, old address and new address of the occupant of a structure. In the case of multiple dwellings, new construction, or vacant structures, however, the owner's name is used. Intersecting streets are shown for the convenience of those requiring such information.

Change sheets are grouped and numbered by quarter-section areas as before. Aside form the exceptions noted below, however, there is only one listing for one street on each page so that the booklets may be separated and arranged alphabetically by street name if that is convenient.

Some streets in certain quarter-section areas were not re-numbered, the existing numbers conforming with the grid system. On those streets, some structures were re-addressed to another street. In such cases a miscellaneous sheet for the quarter-section might list several different street address changes on the same sheet.

Certain street name changes and street re-numbering occurred outside of the general uniform grid re-numbering area. Change sheets for such changes are grouped together with a bottom page identification of "April '56 - Misc." More than one street name change may be on one of those sheets, and number changes on more than one sheet might be listed on the same sheet.

A key map is attached to identify each quarter-section area. Each such area is identified by a circled number and letter. All changes of street number and street name with a quarter-section area are listed on sheets identified at the bottom with the number for the area.

Subsequent changes or corrections to the changes will be sent to the users of the attached booklets, at least during the interim period between the issue of address changes and the publishing of the telephone and city directories.

Very truly yours,

Leonard H. Caro
For the City Engineer

If further assistance of information is required, call the Office of the City Engineer at telephone number 3-3763, and ask for assistance on street re-numbering.

Karl W. Witt	113 "	1425 "

Intersection Chester (E & W)

If you are not the owner, please notify the owner.

See Instructions On Back Side

INSTRUCTIONS FOR STREET AND ADDRESS CHANGE

1. Under ordinances of the City of Peoria and by resolution of the City Council, the City Engineer is directed to assign or re-assign street numbers to conform with the established uniform grid system. This change sheet is to notify you of the official change of street address on your street.

In 1955, that area of the city north of McClure Avenue was re-numbered under the new numbering system. Peoria County areas and certain areas in Peoria Heights have been or are in the process of being re-numbered since 1953. With the completion of the 1956 re-numbering program, of which your change is a part, the major portion of the City of Peoria and its surrounding areas will all be on the same uniform system of street address.

2. In addition to the occupant or owner at each address, this change notice is sent to the following agencies for correction of their records:

Central Illinois Light Co.	Peoria Public Library
Illinois Bell Telephone Co.	Peoria Fire Department
Peoria Water Works Co.	Peoria Police Department
D. A. Horan Co. (Rubbish Collection)	County Recorder
R. L. Polk Co. (City Directory)	Illinois Inspection Bureau
Tax Assessor	Election Commission
Board of Education	U. S. Post Office

The individual whose address is changed will be responsible for changing his address with publishers and other correspondents not listed above. The enclosed change of address cards are for your use. If you need more of these cards the post office will furnish them.

3. Numbers can be purchased in many places. Hardware and appliance stores, auto parts stores, novelty stores, ten-cent stores, Junior Association of Commerce, Junior Achievement groups, certain church organizations are among those who have sold numbers in the past.

The numerals you place should be at least 2½ inches high, durable and securely attached, and of such a color that they might be visible from the street day or night. Street number assignments are made in accordance with the location of the entrance door. The number should be placed on, beside, or above that entrance, or in such other place that the address for each entrance can be clearly understood.

It is suggested that you leave the old number in place for 90 days after receiving this notice. Place the new number above it. This will help postal carriers and others who must use your street number. Please place numbers within 30 days.

4. To avoid two changes, the street name change is made at the same time that the street number change is made. If your street name is changed, the new street name sign will be placed very soon.

5. All streets are numbered north or south from Aiken Avenue or east or west from Knoxville Avenue. The prefix letter, N, S, E, or W, is part of the street name and should be used. Use of the prefix letter will help everyone use the new street numbers.

6. All the street number changes made north of McClure Avenue in 1955, and in the remainder of the City at this time, are to be in the 1956 edition of the telephone directory and the city directory.

7. Approximately 20,000 street number changes are being made this year. If you can make the change as directed in these instructions, much of the confusion and inconvenience of the change will be eliminated. If you do require more information or assistance, please call "Street Numbering," City Engineer's Office, Telephone 3-3763.

By the direction of the City Engineer.

Leonard H. Caro
Project Engineer

INSTRUCTIONS FOR STREET AND ADDRESS CHANGE

1. Under ordinances of the City of Peoria and by resolution of the City Council, the City Engineer is directed to assign or re-assign street numbers to conform with the established uniform grid system. This change sheet is to notify you of the official change of street address on your street.

In 1955, that area of the city north of McClure Avenue was re-numbered under the new numbering system. Peoria County areas and certain areas in Peoria Heights have been or are in the process of being re-numbered since 1953. With the completion of the 1956 re-numbering program, of which your change is a part, the major portion of the City of Peoria and its surrounding areas will all be on the same uniform system of street address.

2. In addition to the occupant or owner at each address, this change notice is sent to the following agencies for correction of their records:

Central Illincis Light Co.	Peoria Public Library
Illinois Bell Telephone Co.	Peoria Fire Department
Peoria Water Works Co.	Peoria Police Department
D. E. Horan Co. (Rubbish Collection)	County Recorder
R. L. Polk Co. (City Directory)	Illinois Inspection Bureau
Tax Assessor	Election Commission
Board of Education	U. S. Post Office

The individual whose address is changed will be responsible for changing his address with publishers and other correspondents not listed above. The enclosed change of address cards are for your use. If you need more of these cards the post office will furnish them.

3. Numbers can be purchased in many places. Hardware and appliance stores, auto parts stores, novelty stores, ten-cent stores, Junior Association of Commerce, Junior Achievement groups, certain church organizations are among those who have sold numbers in the past.

The numerals you place should be at least 2½ inches high, durable and securely attached, and of such a color that they might be visible from the street day or night. Street number assignments are made in accordance with the location of the entrance door. The number should be placed on, beside, or above that entrance, or in such other place that the address for each entrance can be clearly understood.

It is suggested that you leave the old number in place for 90 days after receiving this notice. Place the new number above it. This will help postal carriers and others who must use your street number. Please place numbers within 30 days.

4. To avoid two changes, the street name change is made at the same time that the street number change is made. If your street name is changed, the new street name sign will be placed very soon.

5. All streets are numbered north or south from Aiken Avenue or east or west from Knoxville Avenue. The prefix letter, N, S, E, or W, is part of the street name and should be used. Use of the prefix letter will help everyone use the new street numbers.

6. All the street number changes made north of McClure Avenue in 1955, and in the remainder of the City at this time, are to be in the 1956 edition of the telephone directory and the city directory.

7. Approximately 20,000 street number changes are being made this year. If you can make the change as directed in these instructions, much of the confusion and inconvenience of the change will be eliminated. If you do require more information or assistance, please call "Street Numbering," City Engineer's Office, Telephone 3-3763.

By the direction of the City Engineer.

Leonard H. Caro
Project Engineer

INSTRUCTIONS FOR STREET AND ADDRESS CHANGE

1. Under ordinances of the City of Peoria and by resolution of the City Council, the City Engineer is directed to assign or re-assign street numbers to conform with the established uniform grid system. This change sheet is to notify you of the official change of street address on your street.

In 1955, that area of the city north of McClure Avenue was re-numbered under the new numbering system. Peoria County areas and certain areas in Peoria Heights have been or are in the process of being re-numbered since 1953. With the completion of the 1956 re-numbering program, of which your change is a part, the major portion of the City of Peoria and its surrounding areas will all be on the same uniform system of street address.

2. In addition to the occupant or owner at each address, this change notice is sent to the following agencies for correction of their records:

Central Illinois Light Co.	Peoria Public Library
Illinois Bell Telephone Co.	Peoria Fire Department
Peoria Water Works Co.	Peoria Police Department
D. E. Moran Co. (Rubbish Collection)	County Recorder
R. L. Polk Co. (City Directory)	Illinois Inspection Bureau
Tax Assessor	Election Commission
Board of Education	U. S. Post Office

The individual whose address is changed will be responsible for changing his address with publishers and other correspondents not listed above. The enclosed change of address cards are for your use. If you need more of these cards the post office will furnish them.

3. Numbers can be purchased in many places. Hardware and appliance stores, auto parts stores, novelty stores, ten-cent stores, Junior Association of Commerce, Junior Achievement groups, certain church organizations are among those who have sold numbers in the past.

The numerals you place should be at least 2½ inches high, durable and securely attached, and of such a color that they might be visible from the street day or night. Street number assignments are made in accordance with the location of the entrance door. The number should be placed on, beside, or above that entrance, or in such other place that the address for each entrance can be clearly understood.

It is suggested that you leave the old number in place for 90 days after receiving this notice. Place the new number above it. This will help postal carriers and others who must use your street number. Please place numbers within 30 days.

4. To avoid two changes, the street name change is made at the same time that the street number change is made. If your street name is changed, the new street name sign will be placed very soon.

5. All streets are numbered north or south from Aiken Avenue or east or west from Knoxville Avenue. The prefix letter, N, S, E, or W, is part of the street name and should be used. Use of the prefix letter will help everyone use the new street numbers.

6. All the street number changes made north of McClure Avenue in 1955, and in the remainder of the City at this time, are to be in the 1956 edition of the telephone directory and the city directory.

7. Approximately 20,000 street number changes are being made this year. If you can make the change as directed in these instructions, much of the confusion and inconvenience of the change will be eliminated. If you do require more information or assistance, please call "Street Numbering," City Engineer's Office, Telephone 3-3763.

By the direction of the City Engineer.

CORRECTION SHEET, MAY 11, 1956

5-D-32

INSTRUCTIONS FOR STREET AND ADDRESS CHANGE

1. Under ordinances of the City of Peoria and by resolution of the City Council, the City Engineer is directed to assign or re-assign street numbers to conform with the established uniform grid system. This change sheet is to notify you of the official change of street address on your street.

In 1955, that area of the city north of McClure Avenue was re-numbered under the new numbering system. Peoria County areas and certain areas in Peoria Heights have been or are in the process of being re-numbered since 1953. With the completion of the 1956 re-numbering program, of which your change is a part, the major portion of the City of Peoria and its surrounding areas will all be on the same uniform system of street address.

2. In addition to the occupant or owner at each address, this change notice is sent to the following agencies for correction of their records:

Central Illinois Light Co.	Peoria Public Library
Illinois Bell Telephone Co.	Peoria Fire Department
Peoria Water Works Co.	Peoria Police Department
D. A. Horan Co. (Rubbish Collection)	County Recorder
R. L. Polk Co. (City Directory)	Illinois Inspection Bureau
Tax Assessor	Election Commission
Board of Education	U. S. Post Office

The individual whose address is changed will be responsible for changing his address with publishers and other correspondents not listed above. The enclosed change of address cards are for your use. If you need more of these cards the post office will furnish them.

3. Numbers can be purchased in many places. Hardware and appliance stores, auto parts stores, novelty stores, ten-cent stores, Junior Association of Commerce, Junior Achievement groups, certain church organizations are among those who have sold numbers in the past.

The numerals you place should be at least 2½ inches high, durable and securely attached, and of such a color that they might be visible from the street day or night. Street number assignments are made in accordance with the location of the entrance door. The number should be placed on, beside, or above that entrance, or in such other place that the address for each entrance can be clearly understood.

It is suggested that you leave the old number in place for 90 days after receiving this notice. Place the new number above it. This will help postal carriers and others who must use your street number. Please place numbers within 30 days.

4. To avoid two changes, the street name change is made at the same time that the street number change is made. If your street name is changed, the new street name sign will be placed very soon.

5. All streets are numbered north or south from Aiken Avenue or east or west from Knoxville Avenue. The prefix letter, N, S, E, or W, is part of the street name and should be used. Use of the prefix letter will help everyone use the new street numbers.

6. All the street number changes made north of McClure Avenue in 1955, and in the remainder of the City at this time, are to be in the 1956 edition of the telephone directory and the city directory.

7. Approximately 20,000 street number changes are being made this year. If you can make the change as directed in these instructions, much of the confusion and inconvenience of the change will be eliminated. If you do require more information or assistance, please call "Street Numbering," City Engineer's Office, Telephone 3-3763.

By the direction of the City Engineer.

Leonard H. Caro
Project Engineer

Mrs. A. Applebaum	107 "	1415 "
	End Of Way	

If you are not the owner, please notify the owner.

See Instructions On Back Side

INSTRUCTIONS FOR STREET AND ADDRESS CHANGE

1. Under ordinances of the City of Peoria and by resolution of the City Council, the City Engineer is directed to assign or re-assign street numbers to conform with the established uniform grid system. This change sheet is to notify you of the official change of street address on your street.

In 1955, that area of the city north of McClure Avenue was re-numbered under the new numbering system. Peoria County areas and certain areas in Peoria Heights have been or are in the process of being re-numbered since 1953. With the completion of the 1956 re-numbering program, of which your change is a part, the major portion of the City of Peoria and its surrounding areas will all be on the same uniform system of street address.

2. In addition to the occupant or owner at each address, this change notice is sent to the following agencies for correction of their records:

Central Illinois Light Co.	Peoria Public Library
Illinois Bell Telephone Co.	Peoria Fire Department
Peoria Water Works Co.	Peoria Police Department
D. E. Moran Co. (Rubbish Collection)	County Recorder
R. L. Polk Co. (City Directory)	Illinois Inspection Bureau
Tax Assessor	Election Commission
Board of Education	U. S. Post Office

The individual whose address is changed will be responsible for changing his address with publishers and other correspondents not listed above. The enclosed change of address cards are for your use. If you need more of these cards the post office will furnish them.

3. Numbers can be purchased in many places. Hardware and appliance stores, auto parts stores, novelty stores, ten-cent stores, Junior Association of Commerce, Junior Achievement groups, certain church organizations are among those who have sold numbers in the past.

The numerals you place should be at least 2½ inches high, durable and securely attached, and of such a color that they might be visible from the street day or night. Street number assignments are made in accordance with the location of the entrance door. The number should be placed on, beside, or above that entrance, or in such other place that the address for each entrance can be clearly understood.

It is suggested that you leave the old number in place for 90 days after receiving this notice. Place the new number above it. This will help postal carriers and others who must use your street number. Please place numbers within 30 days.

4. To avoid two changes, the street name change is made at the same time that the street number change is made. If your street name is changed, the new street name sign will be placed very soon.

5. All streets are numbered north or south from Aiken Avenue or east or west from Knoxville Avenue. The prefix letter, N, S, E, or W, is part of the street name and should be used. Use of the prefix letter will help everyone use the new street numbers.

6. All the street number changes made north of McClure Avenue in 1955, and in the remainder of the City at this time, are to be in the 1956 edition of the telephone directory and the city directory.

7. Approximately 20,000 street number changes are being made this year. If you can make the change as directed in these instructions, much of the confusion and inconvenience of the change will be eliminated. If you do require more information or assistance, please call "Street Numbering," City Engineer's Office, Telephone 3-3763.

By the direction of the City Engineer.

Leonard H. Caro
Project Engineer

If you are not the owner, please notify the owner.

INSTRUCTIONS FOR STREET AND ADDRESS CHANGE

1. Under ordinances of the City of Peoria and by resolution of the City Council, the City Engineer is directed to assign or re-assign street numbers to conform with the established uniform grid system. This change sheet is to notify you of the official change of street address on your street.

In 1955, that area of the city north of McClure Avenue was re-numbered under the new numbering system. Peoria County areas and certain areas in Peoria Heights have been or are in the process of being re-numbered since 1953. With the completion of the 1956 re-numbering program, of which your change is a part, the major portion of the City of Peoria and its surrounding areas will all be on the same uniform system of street address.

2. In addition to the occupant or owner at each address, this change notice is sent to the following agencies for correction of their records:

Central Illinois Light Co.
Illinois Bell Telephone Co.
Peoria Water Works Co.
D. A. Horan Co. (Rubbish Collection)
R. L. Polk Co. (City Directory)
Tax Assessor
Board of Education
Peoria Public Library
Peoria Fire Department
Peoria Police Department
County Recorder
Illinois Inspection Bureau
Election Commission
U. S. Post Office

The individual whose address is changed will be responsible for changing his address with publishers and other correspondents not listed above. The enclosed change of address cards are for your use. If you need more of these cards the post office will furnish them.

3. Numbers can be purchased in many places. Hardware and appliance stores, auto parts stores, novelty stores, ten-cent stores, Junior Association of Commerce, Junior Achievement groups, certain church organizations are among those who have sold numbers in the past.

The numerals you place should be at least 2½ inches high, durable and securely attached, and of such a color that they might be visible from the street day or night. Street number assignments are made in accordance with the location of the entrance door. The number should be placed on, beside, or above that entrance, or in such other place that the address for each entrance can be clearly understood.

It is suggested that you leave the old number in place for 90 days after receiving this notice. Place the new number above it. This will help postal carriers and others who must use your street number. Please place numbers within 30 days.

4. To avoid two changes, the street name change is made at the same time that the street number change is made. If your street name is changed, the new street name sign will be placed very soon.

5. All streets are numbered north or south from Aiken Avenue or east or west from Knoxville Avenue. The prefix letter, N, S, E, or W, is part of the street name and should be used. Use of the prefix letter will help everyone use the new street numbers.

6. All the street number changes made north of McClure Avenue in 1955, and in the remainder of the City at this time, are to be in the 1956 edition of the telephone directory and the city directory.

7. Approximately 20,000 street number changes are being made this year. If you can make the change as directed in these instructions, much of the confusion and inconvenience of the change will be eliminated. If you do require more information or assistance, please call "Street Numbering," City Engineer's Office, Telephone 3-3763.

By the direction of the City Engineer.

H. Caro
Engineer

OFFICE OF THE CITY ENGINEER

NAME	OLD ADDRESS	NEW ADDRESS
E. J. Golike	305 Flora Avenue	1311 N. Flora Avenue
Ben D. Brewster	307 "	1315 "
	Intersection Armstrong (E & W)	

If you are not the owner, please notify the owner.

See Instructions On Back Side

INSTRUCTIONS FOR STREET AND ADDRESS CHANGE

1. Under ordinances of the City of Peoria and by resolution of the City Council, the City Engineer is directed to assign or re-assign street numbers to conform with the established uniform grid system. This change sheet is to notify you of the official change of street address on your street.

In 1955, that area of the city north of McClure Avenue was re-numbered under the new numbering system. Peoria County areas and certain areas in Peoria Heights have been or are in the process of being re-numbered since 1953. With the completion of the 1956 re-numbering program, of which your change is a part, the major portion of the City of Peoria and its surrounding areas will all be on the same uniform system of street address.

2. In addition to the occupant or owner at each address, this change notice is sent to the following agencies for correction of their records:

Central Illinois Light Co.	Peoria Public Library
Illinois Bell Telephone Co.	Peoria Fire Department
Peoria Water Works Co.	Peoria Police Department
D. E. Moran Co. (Rubbish Collection)	County Recorder
R. L. Polk Co. (City Directory)	Illinois Inspection Bureau
Tax Assessor	Election Commission
Board of Education	U. S. Post Office

The individual whose address is changed will be responsible for changing his address with publishers and other correspondents not listed above. The enclosed change of address cards are for your use. If you need more of these cards the post office will furnish them.

3. Numbers can be purchased in many places. Hardware and appliance stores, auto parts stores, novelty stores, ten-cent stores, Junior Association of Commerce, Junior Achievement groups, certain church organizations are among those who have sold numbers in the past.

The numerals you place should be at least 2½ inches high, durable and securely attached, and of such a color that they might be visible from the street day or night. Street number assignments are made in accordance with the location of the entrance door. The number should be placed on, beside, or above that entrance, or in such other place that the address for each entrance can be clearly understood.

It is suggested that you leave the old number in place for 90 days after receiving this notice. Place the new number above it. This will help postal carriers and others who must use your street number. Please place numbers within 30 days.

4. To avoid two changes, the street name change is made at the same time that the street number change is made. If your street name is changed, the new street name sign will be placed very soon.

5. All streets are numbered north or south from Aiken Avenue or east or west from Knoxville Avenue. The prefix letter, N, S, E, or W, is part of the street name and should be used. Use of the prefix letter will help everyone use the new street numbers.

6. All the street number changes made north of McClure Avenue in 1955, and in the remainder of the City at this time, are to be in the 1956 edition of the telephone directory and the city directory.

7. Approximately 20,000 street number changes are being made this year. If you can make the change as directed in these instructions, much of the confusion and inconvenience of the change will be eliminated. If you do require more information or assistance, please call "Street Numbering," City Engineer's Office, Telephone 3-3763.

By the direction of the City Engineer.

Leonard H. Caro
Project Engineer

See Instructions On Back Side

4-B -2 If you are not the owner, please notify the owner.

INSTRUCTIONS FOR STREET AND ROAD NO CHANGES

1. Under ordinances of the City of Peoria and by resolution of the City Council, the City Engineer is directed to assign or re-assign street numbers to conform with the established uniform grid system. This change sheet is to notify you of the official change of street address on your street.

In 1955, that area of the city north of McClure Avenue was re-numbered under the new numbering system. Peoria County areas and certain areas in Peoria Heights have been or are in the process of being re-numbered since 1953. With the completion of the 1956 re-numbering program, of which your change is a part, the major portion of the City of Peoria and its surrounding areas will all be on the same uniform system of street address.

2. In addition to the occupant or owner at each address, this change notice is sent to the following agencies for correction of their records:

Central Illinois Light Co.	Peoria Public Library
Illinois Bell Telephone Co.	Peoria Fire Department
Peoria Water Works Co.	Peoria Police Department
D. E. Horan Co. (Rubbish Collection)	County Recorder
R. L. Polk Co. (City Directory)	Illinois Inspection Bureau
Tax Assessor	Election Commission
Board of Education	U. S. Post Office

The individual whose address is changed will be responsible for changing his address with publishers and other correspondents not listed above. The enclosed change of address cards are for your use. If you need more of these cards the post office will furnish them.

3. Numbers can be purchased in many places. Hardware and appliance stores, auto parts stores, novelty stores, ten-cent stores, Junior Association of Commerce, Junior Achievement groups, certain church organizations are among those who have sold numbers in the past.

The numerals you place should be at least 2½ inches high, durable and securely attached, and of such a color that they might be visible from the street day or night. Street number assignments are made in accordance with the location of the entrance door. The number should be placed on, beside, or above that entrance, or in such other place that the address for each entrance can be clearly understood.

It is suggested that you leave the old number in place for 90 days after receiving this notice. Place the new number above it. This will help postal carriers and others who must use your street number. Please place numbers within 30 days.

4. To avoid two changes, the street name change is made at the same time that the street number change is made. If your street name is changed, the new street name sign will be placed very soon.

5. All streets are numbered north or south from Aiken Avenue or east or west from Knoxville Avenue. The prefix letter, N, S, E, or W, is part of the street name and should be used. Use of the prefix letter will help everyone use the new street numbers.

6. All the street number changes made north of McClure Avenue in 1955, and in the remainder of the City at this time, are to be in the 1956 edition of the telephone directory and the city directory.

7. Approximately 20,000 street number changes are being made this year. If you can make the change as directed in these instructions, much of the confusion and inconvenience of the change will be eliminated. If you do require more information or assistance, please call "Street Numbering," City Engineer's Office, Telephone 3-3763.

By the direction of the City Engineer.

Leonard H. Caro
Project Engineer

If you are not the owner, please notify the owner.

INSTRUCTIONS FOR STREET AND ADDRESS CHANGE

1. Under ordinances of the City of Peoria and by resolution of the City Council, the City Engineer is directed to assign or re-assign street numbers to conform with the established uniform grid system. This change sheet is to notify you of the official change of street address on your street.

In 1955, that area of the city north of McClure Avenue was re-numbered under the new numbering system. Peoria County areas and certain areas in Peoria Heights have been or are in the process of being re-numbered since 1953. With the completion of the 1956 re-numbering program, of which your change is a part, the major portion of the City of Peoria and its surrounding areas will all be on the same uniform system of street address.

2. In addition to the occupant or owner at each address, this change notice is sent to the following agencies for correction of their records:

Central Illinois Light Co.	Peoria Public Library
Illinois Bell Telephone Co.	Peoria Fire Department
Peoria Water Works Co.	Peoria Police Department
D. S. Moran Co. (Rubbish Collection)	County Recorder
R. L. Polk Co. (City Directory)	Illinois Inspection Bureau
Tax Assessor	Election Commission
Board of Education	U. S. Post Office

The individual whose address is changed will be responsible for changing his address with publishers and other correspondents not listed above. The enclosed change of address cards are for your use. If you need more of these cards the post office will furnish them.

3. Numbers can be purchased in many places. Hardware and appliance stores, auto parts stores, novelty stores, ten-cent stores, Junior Association of Commerce, Junior Achievement groups, certain church organizations are among those who have sold numbers in the past.

The numerals you place should be at least 2½ inches high, durable and securely attached, and of such a color that they might be visible from the street day or night. Street number assignments are made in accordance with the location of the entrance door. The number should be placed on, beside, or above that entrance, or in such other place that the address for each entrance can be clearly understood.

It is suggested that you leave the old number in place for 90 days after receiving this notice. Place the new number above it. This will help postal carriers and others who must use your street number. Please place numbers within 30 days.

4. To avoid two changes, the street name change is made at the same time that the street number change is made. If your street name is changed, the new street name sign will be placed very soon.

5. All streets are numbered north or south from Aiken Avenue or east or west from Knoxville Avenue. The prefix letter, N, S, E, or W, is part of the street name and should be used. Use of the prefix letter will help everyone use the new street numbers.

6. All the street number changes made north of McClure Avenue in 1955, and in the remainder of the City at this time, are to be in the 1956 edition of the telephone directory and the city directory.

7. Approximately 20,000 street number changes are being made this year. If you can make the change as directed in these instructions, much of the confusion and inconvenience of the change will be eliminated. If you do require more information or assistance, please call "Street Numbering," City Engineer's Office, Telephone 3-3763.

By the direction of the City Engineer.

Leonard H. Caro
Project Engineer

If you are not the owner, please notifty the owner.

INSTRUCTIONS FOR STREET AND ADDRESS CHANGE

1. Under ordinances of the City of Peoria and by resolution of the City Council, the City Engineer is directed to assign or re-assign street numbers to conform with the established uniform grid system. This change sheet is to notify you of the official change of street address on your street.

In 1955, that area of the city north of McClure Avenue was re-numbered under the new numbering system. Peoria County areas and certain areas in Peoria Heights have been or are in the process of being re-numbered since 1953. With the completion of the 1956 re-numbering program, of which your change is a part, the major portion of the City of Peoria and its surrounding areas will all be on the same uniform system of street address.

2. In addition to the occupant or owner at each address, this change notice is sent to the following agencies for correction of their records:

Central Illinois Light Co.	Peoria Public Library
Illinois Bell Telephone Co.	Peoria Fire Department
Peoria Water Works Co.	Peoria Police Department
D. E. Horan Co. (Rubbish Collection)	County Recorder
R. L. Polk Co. (City Directory)	Illinois Inspection Bureau
Tax Assessor	Election Commission
Board of Education	U. S. Post Office

The individual whose address is changed will be responsible for changing his address with publishers and other correspondents not listed above. The enclosed change of address cards are for your use. If you need more of these cards the post office will furnish them.

3. Numbers can be purchased in many places. Hardware and appliance stores, auto parts stores, novelty stores, ten-cent stores, Junior Association of Commerce, Junior Achievement groups, certain church organizations are among those who have sold numbers in the past.

The numerals you place should be at least 2½ inches high, durable and securely attached, and of such a color that they might be visible from the street day or night. Street number assignments are made in accordance with the location of the entrance door. The number should be placed on, beside, or above that entrance, or in such other place that the address for each entrance can be clearly understood.

It is suggested that you leave the old number in place for 90 days after receiving this notice. Place the new number above it. This will help postal carriers and others who must use your street number. Please place numbers within 30 days.

4. To avoid two changes, the street name change is made at the same time that the street number change is made. If your street name is changed, the new street name sign will be placed very soon.

5. All streets are numbered north or south from Aiken Avenue or east or west from Knoxville Avenue. The prefix letter, N, S, E, or W, is part of the street name and should be used. Use of the prefix letter will help everyone use the new street numbers.

6. All the street number changes made north of McClure Avenue in 1955, and in the remainder of the City at this time, are to be in the 1956 edition of the telephone directory and the city directory.

7. Approximately 20,000 street number changes are being made this year. If you can make the change as directed in these instructions, much of the confusion and inconvenience of the change will be eliminated. If you do require more information or assistance, please call "Street Numbering," City Engineer's Office, Telephone 3-3763.

By the direction of the City Engineer.

If you are not the owner, please notify the owner.

INSTRUCTIONS FOR STREET AND ADDRESS CHANGE

1. Under ordinances of the City of Peoria and by resolution of the City Council, the City Engineer is directed to assign or re-assign street numbers to conform with the established uniform grid system. This change sheet is to notify you of the official change of street address on your street.

In 1955, that area of the city north of McClure Avenue was re-numbered under the new numbering system. Peoria County areas and certain areas in Peoria Heights have been or are in the process of being re-numbered since 1953. With the completion of the 1956 re-numbering program, of which your change is a part, the major portion of the City of Peoria and its surrounding areas will all be on the same uniform system of street address.

2. In addition to the occupant or owner at each address, this change notice is sent to the following agencies for correction of their records:

Central Illinois Light Co.	Peoria Public Library
Illinois Bell Telephone Co.	Peoria Fire Department
Peoria Water Works Co.	Peoria Police Department
D. A. Moran Co. (Rubbish Collection)	County Recorder
R. L. Polk Co. (City Directory)	Illinois Inspection Bureau
Tax Assessor	Election Commission
Board of Education	U. S. Post Office

The individual whose address is changed will be responsible for changing his address with publishers and other correspondents not listed above. The enclosed change of address cards are for your use. If you need more of these cards the post office will furnish them.

3. Numbers can be purchased in many places. Hardware and appliance stores, auto parts stores, novelty stores, ten-cent stores, Junior Association of Commerce, Junior Achievement groups, certain church organizations are among those who have sold numbers in the past.

The numerals you place should be at least 2½ inches high, durable and securely attached, and of such a color that they might be visible from the street day or night. Street number assignments are made in accordance with the location of the entrance door. The number should be placed on, beside, or above that entrance, or in such other place that the address for each entrance can be clearly understood.

It is suggested that you leave the old number in place for 90 days after receiving this notice. Place the new number above it. This will help postal carriers and others who must use your street number. Please place numbers within 30 days.

4. To avoid two changes, the street name change is made at the same time that the street number change is made. If your street name is changed, the new street name sign will be placed very soon.

5. All streets are numbered north or south from Aiken Avenue or east or west from Knoxville Avenue. The prefix letter, N, S, E, or W, is part of the street name and should be used. Use of the prefix letter will help everyone use the new street numbers.

6. All the street number changes made north of McClure Avenue in 1955, and in the remainder of the City at this time, are to be in the 1956 edition of the telephone directory and the city directory.

7. Approximately 20,000 street number changes are being made this year. If you can make the change as directed in these instructions, much of the confusion and inconvenience of the change will be eliminated. If you do require more information or assistance, please call "Street Numbering," City Engineer's Office, Telephone 3-3763.

By the direction of the City Engineer.

Leonard H. Caro
Project Engineer

OFFICE OF THE CITY ENGINEER

See Instructions On Back Side

If you are not the owner, please notify the owner.

INSTRUCTIONS FOR STREET AND ROAD NO CHANGES

1. Under ordinances of the City of Peoria and by resolution of the City Council, the City Engineer is directed to assign or re-assign street numbers to conform with the established uniform grid system. This change sheet is to notify you of the official change of street address on your street.

In 1955, that area of the city north of McClure Avenue was re-numbered under the new numbering system. Peoria County areas and certain areas in Peoria Heights have been or are in the process of being re-numbered since 1953. With the completion of the 1956 re-numbering program, of which your change is a part, the major portion of the City of Peoria and its surrounding areas will all be on the same uniform system of street address.

2. In addition to the occupant or owner at each address, this change notice is sent to the following agencies for correction of their records:

Central Illinois Light Co.	Peoria Public Library
Illinois Bell Telephone Co.	Peoria Fire Department
Peoria Water Works Co.	Peoria Police Department
D. E. Horan Co. (Rubbish Collection)	County Recorder
R. L. Polk Co. (City Directory)	Illinois Inspection Bureau
Tax Assessor	Election Commission
Board of Education	U. S. Post Office

The individual whose address is changed will be responsible for changing his address with publishers and other correspondents not listed above. The enclosed change of address cards are for your use. If you need more of these cards the post office will furnish them.

3. Numbers can be purchased in many places. Hardware and appliance stores, auto parts stores, novelty stores, ten-cent stores, Junior Association of Commerce, Junior Achievement groups, certain church organizations are among those who have sold numbers in the past.

The numerals you place should be at least 2½ inches high, durable and securely attached, and of such a color that they might be visible from the street day or night. Street number assignments are made in accordance with the location of the entrance door. The number should be placed on, beside, or above that entrance, or in such other place that the address for each entrance can be clearly understood.

It is suggested that you leave the old number in place for 90 days after receiving this notice. Place the new number above it. This will help postal carriers and others who must use your street number. Please place numbers within 30 days.

4. To avoid two changes, the street name change is made at the same time that the street number change is made. If your street name is changed, the new street name sign will be placed very soon.

5. All streets are numbered north or south from Aiken Avenue or east or west from Knoxville Avenue. The prefix letter, N, S, E, or W, is part of the street name and should be used. Use of the prefix letter will help everyone use the new street numbers.

6. All the street number changes made north of McClure Avenue in 1955, and in the remainder of the City at this time, are to be in the 1956 edition of the telephone directory and the city directory.

7. Approximately 20,000 street number changes are being made this year. If you can make the change as directed in these instructions, much of the confusion and inconvenience of the change will be eliminated. If you do require more information or assistance, please call "Street Numbering," City Engineer's Office, Telephone 3-3763.

By the direction of the City Engineer.

Leonard H. Caro
Project Engineer

J. Setbacken	218 "	516 "
	Intersection Ellis (N & S)	

If you are not the owner, please notify the owner.

See Instructions On Back Side

INSTRUCTIONS FOR STREET AND ADDRESS CHANGE

1. Under ordinances of the City of Peoria and by resolution of the City Council, the City Engineer is directed to assign or re-assign street numbers to conform with the established uniform grid system. This change sheet is to notify you of the official change of street address on your street.

In 1955, that area of the city north of McClure Avenue was re-numbered under the new numbering system. Peoria County areas and certain areas in Peoria Heights have been or are in the process of being re-numbered since 1953. With the completion of the 1956 re-numbering program, of which your change is a part, the major portion of the City of Peoria and its surrounding areas will all be on the same uniform system of street address.

2. In addition to the occupant or owner at each address, this change notice is sent to the following agencies for correction of their records:

Central Illinois Light Co.	Peoria Public Library
Illinois Bell Telephone Co.	Peoria Fire Department
Peoria Water Works Co.	Peoria Police Department
D. E. Horan Co. (Rubbish Collection)	County Recorder
R. L. Polk Co. (City Directory)	Illinois Inspection Bureau
Tax Assessor	Election Commission
Board of Education	U. S. Post Office

The individual whose address is changed will be responsible for changing his address with publishers and other correspondents not listed above. The enclosed change of address cards are for your use. If you need more of these cards the post office will furnish them.

3. Numbers can be purchased in many places. Hardware and appliance stores, auto parts stores, novelty stores, ten-cent stores, Junior Association of Commerce, Junior Achievement groups, certain church organizations are among those who have sold numbers in the past.

The numerals you place should be at least 2½ inches high, durable and securely attached, and of such a color that they might be visible from the street day or night. Street number assignments are made in accordance with the location of the entrance door. The number should be placed on, beside, or above that entrance, or in such other place that the address for each entrance can be clearly understood.

It is suggested that you leave the old number in place for 90 days after receiving this notice. Place the new number above it. This will help postal carriers and others who must use your street number. Please place numbers within 30 days.

4. To avoid two changes, the street name change is made at the same time that the street number change is made. If your street name is changed, the new street name sign will be placed very soon.

5. All streets are numbered north or south from Aiken Avenue or east or west from Knoxville Avenue. The prefix letter, N, S, E, or W, is part of the street name and should be used. Use of the prefix letter will help everyone use the new street numbers.

6. All the street number changes made north of McClure Avenue in 1955, and in the remainder of the City at this time, are to be in the 1956 edition of the telephone directory and the city directory.

7. Approximately 20,000 street number changes are being made this year. If you can make the change as directed in these instructions, much of the confusion and inconvenience of the change will be eliminated. If you do require more information or assistance, please call "Street Numbering," City Engineer's Office, Telephone 3-3763.

By the direction of the City Engineer.

Leonard H. Caro
Project Engineer

OFFICE OF THE CITY ENGINEER

PEORIA, ILLINOIS

Herman Finklestein	600 W. Armstrong	1321 N. Ellis Street

If you are not the owner, please notify the owner.

See Instructions On Back Side

4-B (Misc.)

INSTRUCTIONS FOR USE OF ADDRESS CHANGE

1. Under ordinances of the City of Peoria and by resolution of the City Council, the City Engineer is directed to assign or re-assign street numbers to conform with the established uniform grid system. This change sheet is to notify you of the official change of street address on your street.

In 1955, that area of the city north of McClure Avenue was re-numbered under the new numbering system. Peoria County areas and certain areas in Peoria Heights have been or are in the process of being re-numbered since 1953. With the completion of the 1956 re-numbering program, of which your change is a part, the major portion of the City of Peoria and its surrounding areas will all be on the same uniform system of street address.

2. In addition to the occupant or owner at each address, this change notice is sent to the following agencies for correction of their records:

Central Illinois Light Co.	Peoria Public Library
Illinois Bell Telephone Co.	Peoria Fire Department
Peoria Water Works Co.	Peoria Police Department
D. E. Horan Co. (Rubbish Collection)	County Recorder
R. L. Polk Co. (City Directory)	Illinois Inspection Bureau
Tax Assessor	Election Commission
Board of Education	U. S. Post Office

The individual whose address is changed will be responsible for changing his address with publishers and other correspondents not listed above. The enclosed change of address cards are for your use. If you need more of these cards the post office will furnish them.

3. Numbers can be purchased in many places. Hardware and appliance stores, auto parts stores, novelty stores, ten-cent stores, Junior Association of Commerce, Junior Achievement groups, certain church organizations are among those who have sold numbers in the past.

The numerals you place should be at least 2½ inches high, durable and securely attached, and of such a color that they might be visible from the street day or night. Street number assignments are made in accordance with the location of the entrance door. The number should be placed on, beside, or above that entrance, or in such other place that the address for each entrance can be clearly understood.

It is suggested that you leave the old number in place for 90 days after receiving this notice. Place the new number above it. This will help postal carriers and others who must use your street number. Please place numbers within 30 days.

4. To avoid two changes, the street name change is made at the same time that the street number change is made. If your street name is changed, the new street name sign will be placed very soon.

5. All streets are numbered north or south from Aiken Avenue or east or west from Knoxville Avenue. The prefix letter, N, S, E, or W, is part of the street name and should be used. Use of the prefix letter will help everyone use the new street numbers.

6. All the street number changes made north of McClure Avenue in 1955, and in the remainder of the City at this time, are to be in the 1956 edition of the telephone directory and the city directory.

7. Approximately 20,000 street number changes are being made this year. If you can make the change as directed in these instructions, much of the confusion and inconvenience of the change will be eliminated. If you do require more information or assistance, please call "Street Numbering," City Engineer's Office, Telephone 3-3763.

By the direction of the City Engineer.

Leonard H. Caro
Project Engineer

INSTRUCTIONS FOR STREET AND ADDRESS CHANGE

1. Under ordinances of the City of Peoria and by resolution of the City Council, the City Engineer is directed to assign or re-assign street numbers to conform with the established uniform grid system. This change sheet is to notify you of the official change of street address on your street.

In 1955, that area of the city north of McClure Avenue was re-numbered under the new numbering system. Peoria County areas and certain areas in Peoria Heights have been or are in the process of being re-numbered since 1953. With the completion of the 1956 re-numbering program, of which your change is a part, the major portion of the City of Peoria and its surrounding areas will all be on the same uniform system of street address.

2. In addition to the occupant or owner at each address, this change notice is sent to the following agencies for correction of their records:

Central Illinois Light Co.	Peoria Public Library
Illinois Bell Telephone Co.	Peoria Fire Department
Peoria Water Works Co.	Peoria Police Department
D. E. Horan Co. (Rubbish Collection)	County Recorder
R. L. Polk Co. (City Directory)	Illinois Inspection Bureau
Tax Assessor	Election Commission
Board of Education	U. S. Post Office

The individual whose address is changed will be responsible for changing his address with publishers and other correspondents not listed above. The enclosed change of address cards are for your use. If you need more of these cards the post office will furnish them.

3. Numbers can be purchased in many places. Hardware and appliance stores, auto parts stores, novelty stores, ten-cent stores, Junior Association of Commerce, Junior Achievement groups, certain church organizations are among those who have sold numbers in the past.

The numerals you place should be at least 2½ inches high, durable and securely attached, and of such a color that they might be visible from the street day or night. Street number assignments are made in accordance with the location of the entrance door. The number should be placed on, beside, or above that entrance, or in such other place that the address for each entrance can be clearly understood.

It is suggested that you leave the old number in place for 90 days after receiving this notice. Place the new number above it. This will help postal carriers and others who must use your street number. Please place numbers within 30 days.

4. To avoid two changes, the street name change is made at the same time that the street number change is made. If your street name is changed, the new street name sign will be placed very soon.

5. All streets are numbered north or south from Aiken Avenue or east or west from Knoxville Avenue. The prefix letter, N, S, E, or W, is part of the street name and should be used. Use of the prefix letter will help everyone use the new street numbers.

6. All the street number changes made north of McClure Avenue in 1955, and in the remainder of the City at this time, are to be in the 1956 edition of the telephone directory and the city directory.

7. Approximately 20,000 street number changes are being made this year. If you can make the change as directed in these instructions, much of the confusion and inconvenience of the change will be eliminated. If you do require more information or assistance, please call "Street Numbering," City Engineer's Office, Telephone 3-3763.

By the direction of the City Engineer.

4-B

INSTRUCTIONS FOR STREET AND ADDRESS CHANGE

1. Under ordinances of the City of Peoria and by resolution of the City Council, the City Engineer is directed to assign or re-assign street numbers to conform with the established uniform grid system. This change sheet is to notify you of the official change of street address on your street.

In 1955, that area of the city north of McClure Avenue was re-numbered under the new numbering system. Peoria County areas and certain areas in Peoria Heights have been or are in the process of being re-numbered since 1953. With the completion of the 1956 re-numbering program, of which your change is a part, the major portion of the City of Peoria and its surrounding areas will all be on the same uniform system of street address.

2. In addition to the occupant or owner at each address, this change notice is sent to the following agencies for correction of their records:

Central Illinois Light Co.	Peoria Public Library
Illinois Bell Telephone Co.	Peoria Fire Department
Peoria Water Works Co.	Peoria Police Department
D. E. Horan Co. (Rubbish Collection)	County Recorder
R. L. Polk Co. (City Directory)	Illinois Inspection Bureau
Tax Assessor	Election Commission
Board of Education	U. S. Post Office

The individual whose address is changed will be responsible for changing his address with publishers and other correspondents not listed above. The enclosed change of address cards are for your use. If you need more of these cards the post office will furnish them.

3. Numbers can be purchased in many places. Hardware and appliance stores, auto parts stores, novelty stores, ten-cent stores, Junior Association of Commerce, Junior Achievement groups, certain church organizations are among those who have sold numbers in the past.

The numerals you place should be at least 2½ inches high, durable and securely attached, and of such a color that they might be visible from the street day or night. Street number assignments are made in accordance with the location of the entrance door. The number should be placed on, beside, or above that entrance, or in such other place that the address for each entrance can be clearly understood.

It is suggested that you leave the old number in place for 90 days after receiving this notice. Place the new number above it. This will help postal carriers and others who must use your street number. Please place numbers within 30 days.

4. To avoid two changes, the street name change is made at the same time that the street number change is made. If your street name is changed, the new street name sign will be placed very soon.

5. All streets are numbered north or south from Aiken Avenue or east or west from Knoxville Avenue. The prefix letter, N, S, E, or W, is part of the street name and should be used. Use of the prefix letter will help everyone use the new street numbers.

6. All the street number changes made north of McClure Avenue in 1955, and in the remainder of the City at this time, are to be in the 1956 edition of the telephone directory and the city directory.

7. Approximately 20,000 street number changes are being made this year. If you can make the change as directed in these instructions, much of the confusion and inconvenience of the change will be eliminated. If you do require more information or assistance, please call "Street Numbering," City Engineer's Office, Telephone 3-3763.

By the direction of the City Engineer.

Leonard H. Caro
Project Engineer

INSTRUCTIONS FOR STREET AND ADDRESS CHANGE

1. Under ordinances of the City of Peoria and by resolution of the City Council, the City Engineer is directed to assign or re-assign street numbers to conform with the established uniform grid system. This change sheet is to notify you of the official change of street address on your street.

In 1955, that area of the city north of McClure Avenue was re-numbered under the new numbering system. Peoria County areas and certain areas in Peoria Heights have been or are in the process of being re-numbered since 1953. With the completion of the 1956 re-numbering program, of which your change is a part, the major portion of the City of Peoria and its surrounding areas will all be on the same uniform system of street address.

2. In addition to the occupant or owner at each address, this change notice is sent to the following agencies for correction of their records:

Central Illinois Light Co.	Peoria Public Library
Illinois Bell Telephone Co.	Peoria Fire Department
Peoria Water Works Co.	Peoria Police Department
D. E. Horan Co. (Rubbish Collection)	County Recorder
R. L. Polk Co. (City Directory)	Illinois Inspection Bureau
Tax Assessor	Election Commission
Board of Education	U. S. Post Office

The individual whose address is changed will be responsible for changing his address with publishers and other correspondents not listed above. The enclosed change of address cards are for your use. If you need more of these cards the post office will furnish them.

3. Numbers can be purchased in many places. Hardware and appliance stores, auto parts stores, novelty stores, ten-cent stores, Junior Association of Commerce, Junior Achievement groups, certain church organizations are among those who have sold numbers in the past.

The numerals you place should be at least 2½ inches high, durable and securely attached, and of such a color that they might be visible from the street day or night. Street number assignments are made in accordance with the location of the entrance door. The number should be placed on, beside, or above that entrance, or in such other place that the address for each entrance can be clearly understood.

It is suggested that you leave the old number in place for 90 days after receiving this notice. Place the new number above it. This will help postal carriers and others who must use your street number. Please place numbers within 30 days.

4. To avoid two changes, the street name change is made at the same time that the street number change is made. If your street name is changed, the new street name sign will be placed very soon.

5. All streets are numbered north or south from Aiken Avenue or east or west from Knoxville Avenue. The prefix letter, N, S, E, or W, is part of the street name and should be used. Use of the prefix letter will help everyone use the new street numbers.

6. All the street number changes made north of McClure Avenue in 1955, and in the remainder of the City at this time, are to be in the 1956 edition of the telephone directory and the city directory.

7. Approximately 20,000 street number changes are being made this year. If you can make the change as directed in these instructions, much of the confusion and inconvenience of the change will be eliminated. If you do require more information or assistance, please call "Street Numbering," City Engineer's Office, Telephone 3-3763.

By the direction of the City Engineer.

Leonard H. Caro
Project Engineer
